

The **Kronos 500** **GNSS RTK** **System**

COMPACT AND COMPLETE

The Kronos 500 GNSS RTK System

Compact and Complete

The Kronos 500 is a new generation compact GNSS RTK receiver system, weighing in only at 950g, with all the features of the Kronos 200M and more. This would allow the user to literally hold the advanced solution to RTK issues in the palm of his hand with ease.

KEY FEATURES AT A GLANCE:

New compact housing

All new, compact, impact resistant housing, constructed with robust magnesium alloy, for lightweight operation and able to resist drops to concrete from a height of 2.5m.

High portability

The Kronos 500 is now conveniently portable, thanks to the small physical size, and new lightweight casing.

Inbuilt tilt sensor

The inbuilt tilt sensor allows operation of the receiver within 30 degrees of tilt, improving user efficiency and alleviating operation rigidity.

Advanced Satellite constellations compatibility

At the core of the Kronos 500 technology is an advanced GNSS board that allows for GPS, GLONASS, and COMPASS compatibility, including the COMPASS B1, B2 and B3 signals. This allows for the receiver to function based on stand-alone COMPASS satellite signals.

Auto electronic level calibration

The system allows for automatic correction of the survey results, using an electronic bubble sensor. This would allow for jobs to be done without the prior need to level the system

Improved and intelligent system operation

The Kronos 500 system is able to operate intelligently, allowing it to operate faster with higher stability, with reduced power consumptions compared with its predecessors. It also features a real time self-check system to ensure maximum efficiency of operation.

New Bluetooth™ module

The Kronos 500 is equipped with the new v4.0 Bluetooth™ module, which allows for a faster and more reliable connection with external devices, including smartphones and tablets.

Advanced datalink module

The Kronos 500 features a new datalink capability, which would allow it to be compatible with most of the radio communication protocols available currently, and also seamless connectivity to present-day CORS systems.

SPECIFICATIONS

| | |
|------------------------------------|--|
| Surveying Performance | |
| Channel | 220 Channels |
| Signal Tracking | BDS B1, B2, B3 |
| | GPS L1C/A, L1C, L2C, L2E, L5 |
| | GLONASS L1C/A, L1P, L2C/A, L2P, L3 |
| | SBAS L1C/A, L5 (Just for the satellites supporting L5) |
| | Galileo GIOVE-A, GIOVE-B, E1, E5A, E5B |
| | QZSS, WAAS, MSAS, EGNOS, GAGAN, SBAS |
| GNSS Features | Positioning output rate: 1Hz~50Hz |
| | Initialization time: < 10s |
| | Initialization reliability: >99.99% |
| Positioning Precision | |
| Code Differential GNSS Positioning | Horizontal: ± 0.25 m + 1 ppm |
| | Vertical: ± 0.50 m + 1 ppm |
| | SBAS positioning accuracy: typically <5m 3DRMS |
| Static GNSS Surveying | Horizontal: ± 2.5 mm + 0.5 ppm |
| | Vertical: ± 5 mm + 0.5 ppm |
| Real-Time Kinematic Surveying | Horizontal: ± 8 mm + 1 ppm |
| (Baseline < 30km) | Vertical: ± 15 mm + 1 ppm |
| | Horizontal: ± 8 mm + 0.5 ppm |
| Network RTK | Vertical: ± 15 mm + 0.5 ppm |
| | RTK initialization time: 2~8s |
| Physical | |
| Dimension | 12.9 cm x 11.2 cm |
| Weight | 970g (including installed battery) |
| Material | Magnesium aluminum alloy shell |
| Environmental | |
| Operating | -45°C ~ +60°C |
| Storage | -55°C ~ +85°C |
| Humidity | Non-condensing |
| Waterproof/Dustproof | IP67 standard, protected from long time immersion to depth of 1m |
| | IP67 standard, fully protected against blowing dust |
| Shock and Vibration | Not operating: Withstand 2 meters pole drop onto the cement ground naturally |
| | While: Withstand 40G 10 milliseconds sawtooth wave impact test |
| Electrical | |
| Power Consumption | 2W |
| Battery | Rechargeable, removable Lithium-ion battery |
| Battery Life | Single battery: 7h (static mode) 5h (internal UHF base mode) 6h (rover mode) |
| Communications and Data Storage | |
| I/O Port | 5PIN LEMO external power port + RS232 |
| | 7PIN LEMO RS232 + USB |
| | 1 network/radio data link antenna port |
| | SIM card slot |
| Wireless Modem | Integrated internal radio receiver and transmitter 0.5W/2W |
| | External radio transmitter 5W/25W |
| Working frequency | 410-470MHz |
| Communication protocol | TrimTalk450s, TrimMark3, PCC EOT, SOUTH |
| Cellular Mobile Network | WCDMA3.5G network communication module, GPRS/EDGE compatible, CDMA2000/EVDO 3G optional |
| Double Module Bluetooth | BLE Bluetooth 4.0 standard, support for android, ios cellphone connection |
| | Bluetooth 2.1 + EDR standard |
| NFC Communication (Optional) | Realizing close range (shorter than 10cm) automatic pair between Kronos 500 and controller (controller equipped NFC wireless communication module needed) |
| Data Storage/Transmission | 4GB internal storage, more than 3 years raw observation data (about 1.4M/day), based on recording from 14 satellites Plug and play mode of USB data transmission |
| Data Format | Differential data format: CMR+, CMRx, RTCM 2.1, RTCM 2.3, RTCM 3.0, RTCM 3.1, RTCM 3.2 |
| | GPS output data format: NMEA 0183, PJK plane coordinates, binary code |
| | Network model support: VRS, FKP, MAC, supporting NTRIP protocol |
| Inertial Sensing System (Optional) | |
| Tilt Survey | Built-in tilt compensator, correcting coordinates automatically according to the tilt direction and angle of the centering rod |
| Electronic Bubble | Controller software display electronic bubble, checking leveling status of the centering rod real time |
| User Interaction | |
| Buttons | One-button operation, visual operation, convenient and efficient |
